Art Unit: 1734

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a method, classified in class 427, subclass 212.
- II. Claims 11-32, drawn to an apparatus, classified in class 118, subclass 303.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed does not have to be used for treating particulate material but can be used for a different purpose such as a gas filtration/conditioning system.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Wesley Whitmyer on 4/6/06 to request an oral election to the above restriction requirement, but Mr. Whitmyer was on business travel and an oral election did not result.
